

Wastewater Utility Green Power Report

March 2011

Electricity Generated in February: **80,096 kWh (kilowatt hours)**

This is equal to the electricity used by 87 homes in a month.

This amount of electricity would have cost \$5,606 if it had been purchased from Duke Energy.

33,142 gallons of grease were processed in our digesters for the month.

32 tons of food scraps were processed this month.

**18% of our plant's power has been generated
on-site in 2011.**

The City of West Lafayette's Wastewater Utility has pledged to generate at least 10% of its electricity on-site in 2011 as Indiana's first wastewater plant to become an EPA Green Power Partner.
